

CAR PARKING

Following a number of parking issues and complaints from patients in May 2015 this practice passed over the management of our car park to a third party. As a result this company installed an “Automatic Number Plate Recognition” system to monitor the use of our car park.

REMINDER

In order for a patient to comply with the “parking contract” at Burnham Health Centre it is clear that the following **MUST** apply:

- The patient **MUST** be a legitimate visitor to the practice or pharmacy

AND

- The patient **MUST** key in their vehicle registration number on the key pads provided at the time of each visit.

It is clear from the rejection of appeals that failure to register the vehicle number, albeit the patient is at the practice for a legitimate reason, is no excuse.

If you are a regular visitor to the practice or have frequent appointments at the practice you may register your vehicle as a “permit holder” by speaking to our reception staff. This will enable you to visit the practice without the need to key in your registration number each time you attend.

The management of our car park is solely the responsibility of the third party contractors
and

this practice does not benefit financially in any way.
